---

Frontend developer with 2 years of experience, working on projects that will be used for people all around the country, using technologies such as JavaScript, TypeScript, React, Redux, and Ionic. I excel at problem-solving and adding value to the companies I work for.

---

### Experience

#### Prolesys Consultores C.A.

July, 2022 – August, 2023

##### Frontend Developer

- Contributed to the development of four currently operational applications that are being utilized by millions of users across the country.
- Created a cross-platform application for both web and mobile devices using Ionic, React and TypeScript.
- Led the successful development of two frontend projects with React, overseeing the entire process from design to deployment.
- Participated in the strategic planning and organization of the projects I was involved in, intending to develop robust and scalable applications.
- Created code that is both reusable and scalable, resulting in a reduction of overall code volume and improved app performance.

#### Fibex Telecom

September, 2021 - July, 2022

##### Fullstack Developer

- Contributed to the development of five applications currently in production, catering to a nationwide user base, compatible with web, tablet, mobile, and TV devices.
- Led the development of one fullstack geolocation application, developing the frontend React, the backend with Node.js and TypeScript, overseeing the entire process from design to deployment.
- Developed a mobile and television cross-platform OTT application with Ionic. Angular and TypeScript.
- Designed and implemented scalable microservices architecture using Node.js and PHP, seamlessly integrating them into multiple applications.

### Technologies

- |                  |          |           |
|------------------|----------|-----------|
| • JavaScript     | • React  | • Nodejs  |
| • TypeScript     | • Redux  | • Express |
| • Ionic          | • Nextjs | • SQL     |
