PROFESSIONAL PROFILE

Full Stack Developer with 5 years of experience building web and mobile applications for international clients, from development through production deployment. I work primarily with JavaScript/TypeScript (React, Next.js, Node.js, NestJS, and React Native), as well as Ionic, Angular, and Laravel. I have built real-time features (WebSockets, WebRTC), integrated Stripe payments, and automated deployments with CI/CD on Azure and Linux. I apply TDD, Clean Architecture, and Scrum. Currently pursuing a Master's in Big Data & Business Analytics and training in Azure Machine Learning and Microsoft Foundry to integrate AI and data into software products.

WORK AND LEADERSHIP EXPERIENCE

Dlocs **January, 2025 – Present**
FullStack Developer

- Led the full lifecycle of 2 Full Stack web applications, building robust APIs in PHP/Laravel and modern, reactive interfaces with Tailwind CSS, Livewire and Alpine.js.
- Designed and integrated key backend services: secure payment gateways, transactional email sending, and microservices for asynchronous generation/download of PDF reports.
- Modeled and optimized relational databases in SQL Server, designing normalized schemas, indexes and complex queries to maximize performance.
- Managed infrastructure and deployments across Dev, QA, and Pre-production environments on Linux Ubuntu, NGINX, and Microsoft Azure, and built a CI/CD pipeline that automates the deployment process.

Atiempo **July, 2025 – June, 2026**
FullStack Developer - Part Time

- Developed 5 production applications (2 mobile apps with React Native, 1 with Ionic/Angular, and 2 web apps with Next.js) used in more than 4 countries, applying hybrid rendering (SSR/SSG) to improve SEO and page load speed.
- Implemented a real-time architecture with WebSockets, achieving instant data synchronization with low latency and high concurrency.
- Integrated Stripe for subscription management and recurring billing, configuring webhooks for payment synchronization and asynchronous processing.
- Developed a video calling and chat module, integrating real-time communication (WebRTC/WebSockets) for highly stable peer-to-peer communication.

Nexo-it Consultores SpA **January 2024 – November 2024**
Frontend Developer

- Led the migration and modernization of 2 React Native mobile applications, applying dependency refactoring and modern architecture, increasing overall performance by 40%.
- Implemented an automated test suite (unit and integration) with Jest and React Testing Library, applying TDD principles and increasing code coverage to mitigate regressions in production.
- Designed the consumption and synchronization of RESTful APIs, optimizing global state management and caching to support offline use and smooth navigation.

Prolesys Consultores C.A. **July 2022 – September 2023**
Frontend Developer

- Developed and maintained 4 critical, high-availability web applications, currently in operation and serving millions of active users nationwide.
- Designed a system of modular, reusable components, standardizing UI/UX and reducing the volume of duplicated code, which shortened delivery times for new features.
- Actively collaborated in technical planning and sprints under the Scrum methodology, ensuring scalable, accessible and responsive applications.

Fibex Telecom **September 2021 – July 2022**
FullStack Developer

- Contributed to the development of 5 production platforms for web, mobile, tablets and Smart TVs, ensuring responsive compatibility for thousands of simultaneous users.
- Led end-to-end a geolocation application: reactive frontend with React and scalable backend with Node.js, Express and TypeScript, overseeing everything from modeling to deployment.

RELEVANT SKILLS AND COMPETENCIES

Languages: Spanish (Native), Professional English (C1)
IA & Data: Claude Code, GitHub Copilot, Google Antigravity, Microsoft Fabric, Azure Machine Learning, Microsoft Foundry, MLOps, Power Platform, Copilot Studio.
Frontend & Mobile: JavaScript (ES6+), TypeScript, React.js, Next.js, React Native, Angular, Ionic, Tailwind CSS, HTML5, CSS3/SASS, Livewire, Alpine.js.
Backend & APIs: Node.js, Express.js, NestJS, PHP, Laravel, Python, RESTful APIs, WebSockets, WebRTC.
Databases & Cloud: SQL Server, MySQL, PostgreSQL, Microsoft Azure (App Services / VMs), Linux (Ubuntu), NGINX, Docker.
Testing & Best Practices: TDD, DDD, Jest, React Testing Library, Git / GitHub, CI/CD, Clean Code, Clean Architecture, Scrum / Agile.

EDUCATION

EUDE Business School **2026 - Present**
Master's in Big Data & Business Analytics
Universidad Central de Venezuela **2017 - 2024**
Bachelor's Degree in Economics
